

## Configurable Ni Temperature Transmitter DT 45400

Read these instructions before using the product and retain for future information.

### DT 45400

#### ► Before Startup

**When operating the signal converter, certain parts of the module can carry dangerous voltage! Ignoring the warnings can lead to serious injury and/or cause damage!**

The signal converter should only be installed and put into operation by qualified staff. The staff must have studied the warnings in these operating instructions thoroughly.

The signal converter may not be put into operation if the housing is open.

In applications with high operating voltages sufficient distance and isolation as well as shock protection must be ensured.

Safe and trouble-free operation of this device can only be guaranteed if transport, storage and installation are carried out correctly and operation and maintenance are carried out with care.

Appropriate safety measures against electrostatic discharge (ESD) should be taken during range selection and assembly on the transmitter.

#### ► Short description

The configurable transmitter is designed for operating various Ni sensors. The measured values are converted temperature linear into a current or voltage signal.

The configuration can be done either via DIP switch or via an USB-interface with the PC configuration program DRAGOset. A wide variety of standard measuring ranges are available ready to use.

The 3-way isolation guarantees reliable decoupling of the sensor circuit from the processing circuit and prevents linked measurement circuits from influencing each other. The auxiliary power can be supplied via the connection terminals or type-specific via the optional In-Rail-Bus connector (see accessories).

#### ► Configuration and startup

##### Configuring with DIP switch

Use the DIP switches to configure the device, according to table.

##### Configuring with software DRAGOset

Use the software DRAGOset to configure the device. Changes to the configuration and parameterization data can be performed both during operation with a connected measuring circuit and in a disconnected state.

The DRAGOset software is available for download free of charge at: [www.drago-automation.de](http://www.drago-automation.de)

The device is equipped with a programming socket on the front. Use the DRAGOset USB Converter only for connecting the device to the PC (Order no.: DZU1201). To change the configuration and parameterization DIP switch S1-1, 2, 3 have to be set ON!

##### Commissioning Function

The Commissioning Function with a stepped keystone signal on output supports a fast and simple testing of cabling and connection of downstream devices or measuring adjustment. Press the function button located behind the front cover for longer than 3 seconds. The Commissioning Function will be indicated with a yellow LED (quick double off). Output value:

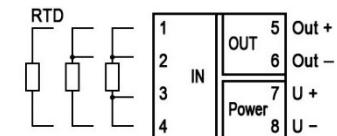

Output	0 %	↗	50 %	↗	100 %	↘	50 %	↘
Time	5 s	3 s	3 s	3 s	5 s	3 s	3 s	3 s

The stepped keystone signal is output continuously. Exit the Commissioning Function by pressing the button again for 3 seconds or power off.

#### ► Mounting, Electrical Connection

The transmitter is mounted on standard 35 mm DIN rail

#### Terminal assignments

#### ► Technical Data

##### Input

Sensor	Measuring Range	Standard	Characteristic
Ni100	-50 ... +250 °C	DIN 43760	TK6180
Ni200	-50 ... +250 °C	DIN 43760	TK6180
Ni500	-50 ... +250 °C	DIN 43760	TK6180
Ni1000	-50 ... +250 °C	DIN 43760	TK6180
Ni120 (TK6720)	-50 ... +250 °C	-	TK6720
Ni1000 (TK5000)	-50 ... +250 °C	-	TK5000
Ni1000 (TK6370)	-50 ... +250 °C	-	TK6370

Range Setting calibrated steps of 25 °C, configurable via DIP switch or USB interface

Measuring span min. 25 K

Measuring error < 0.2 K + 0.05 % meas. val.

Sensor connection 4-wire, 3-wire, 2-wire

Sensor current 0.2 mA

Cable resistance < 100 Ω per wire for 4- and 3-wire connection

##### Output

###### Current

Output signal 0...20 mA

4...20 mA

Load ≤ 12 V (600 Ω at 20 mA)

Residual ripple < 10 mV<sub>ms</sub>

Transfer range 0 to 102.5 % (3.8 to 20.5 mA at output 4 to 20 mA)

Transfer characteristic rising / falling

Error signal/message Sensor- / wire break, error signal configurable

##### General data

Transmission error < 0.1 % full scale

Temperature coefficient<sup>2)</sup> < 100 ppm/K

Measurement rate 4 / s

Response time T99 250 ms

Test voltage 3 kV, 50 Hz, 1 min.  
Input against output against power supply

Working voltage<sup>3)</sup> 600 V AC/DC for overvoltage category II and contamination class 2 acc. to EN 61010-1

Protection against dangerous body currents<sup>3)</sup> Protective Separation by reinforced insulation acc. to EN 61010-1 up to 300 V AC/DC for overvoltage category II and contamination class 2 between input and output and power supply.

Ambient temperature Operation -25 °C to +70 °C (-13 to +158 °F)  
Transport -40 °C to +85 °C (-40 to +185 °F) and storage

Power supply 24 V DC 9.6 V ... 31.2 V, approx. 0.8 W

EMV<sup>4)</sup> EN 61326-1

MTBF 353 years acc. to SN 29500 (stationary continuous operating, average ambient temperature 40 °C)

Construction 6.2 mm (0.244") housing, protection type: IP 20 mounting on 35 mm DIN rail acc. to EN 60715

Connection terminals (see order information) - Screw terminals (plus-minus clamp screws)  
- Cage clamp terminals (Push-In)

Weight Approx. 70 g

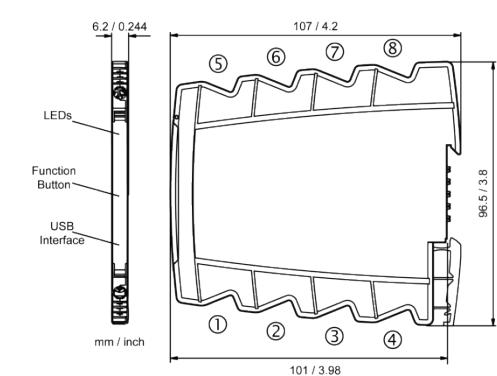

1) Factory setting:  
Input: Ni100, 0...100°C, 4-wire-sensor connection

Output: 0...20 mA, Characteristic rising, error signal 22 mA

2) Average TC related to full scale value in specified operating temperature range, reference temperature 23 °C

3) As far as relevant the standards and rules mentioned above are considered by development and production of our devices. In addition relevant assembly rules are to be considered by installation of our devices in other equipment's. For applications with high working voltages, take measures to prevent accidental contact and make sure that there is sufficient distance or insulation between adjacent situated devices.  
4) Minor deviations possible during interference

#### ► Dimensions

#### ► Connection data

##### Connection

###### Screw terminals

Wire cross-section 0.5 mm<sup>2</sup> - 2.5 mm<sup>2</sup>  
stranded ferruled AWG 20 - 14 AWG 20 - 16

Wire cross-section 0.5 mm<sup>2</sup> - 2.5 mm<sup>2</sup>  
solid wire AWG 20 - 14 AWG 20 - 14

Stripped length 8 mm / 0.3 in 8 mm / 0.3 in

Screw terminal torque 0.6 Nm / 5 lbf in -

#### LIMITED WARRANTY

DRAGO Automation GmbH hereby warrants that the Product will be free from defects in materials or workmanship for a period of **five (5) years** from the date of delivery ("Limited Warranty"). This Limited Warranty is limited to repair or replacement at DRAGO's option and is effective only for the first end-user of the Product. This Limited Warranty applies only if the Product:

1. is installed according to the instructions furnished by DRAGO;
2. is connected to a proper power supply;
3. is not misused or abused; and
4. there is no evidence of tampering, mishandling, neglect, accidental damage, modification or repair without the approval of DRAGO or damage done to the Product by anyone other than DRAGO.

Delivery conditions are based upon the "GENERAL CONDITIONS FOR THE SUPPLY OF PRODUCTS AND SERVICES OF THE ELECTRICAL AND ELECTRONICS INDUSTRY" recommended by the Zentralverband Elektrotechnik- und Elektronikindustrie (ZVEI) e.V..

Subject to change!

#### LED-Signalisierung

Der Messumformer verfügt über eine grüne und eine rot/gelbe LED an der Gerätefront.

LED	Bedeutung
grün	Dauer
	Betriebs-LED, keine Meldung
grün	Blinkt
	Messbereichsüber- schreitung am Eingang
gelb	Langsames Doppelblitzen
	Inbetriebnahme-Funktion aktiv
rot	Blinkt
	Sensorbruch
rot	Doppelblitzen
	Konfigurationsfehler
rot	Dauer
	Gerätefehler, Austausch notwendig

#### Fehlersignalisierung am Ausgang

Kennlinie	Fehler	Ausgangs- bereich	Bereichs- unterschreitung	Bereichs- überschreitung	Sensorbruch / ungültige Konfiguration
